

BOSAQ | Water Experts - Process Engineer Water Treatment

Process Engineer Water Treatment

*As a Process Engineer Water Treatment within our fast-growing company, your job description is broad and challenging. We are looking for an **experienced water engineer in the industry** who will take on process design, installation and follow-up. It's not a requirement to have experience in all areas, although it's a plus. It is especially important that you are **flexible, independent and eager to learn**. Even though we are looking for someone who can manage projects in an **organized and structured** way, your colleagues ensure that you do not have to do everything alone.*

- You are responsible for drawing up the PFD (basic design) and the P&ID (detailed design) for the industrial projects
- You provide technical contacts with suppliers for component selection and are responsible for the technical data sheets of valves / sensors / pumps / membranes (engineering files)
- You will work in an engineering project team on industrial projects and be responsible for determining the final treatment train and capacity
- You identify opportunities for optimization of the installations according to consumption of energy and consumables and work them out together with the R&D team
- You take care of the installation of water purification containers together with bosaq's field service engineers
- You monitor the operation of installations and discuss opportunities for efficiency gains with the project team
- You report to the Water Technology Leader and CTO
- You will work closely with the industrial project manager and report on process progress
- You provide technical support to the sales team for the correct preparation of the technical part of quotations

✂ Skills

The perfect Water technologist:

- Has a degree as a bio-/industrial/civil engineer or master in chemistry

- Has at least 3 years and preferably more than 5 years of experience in a similar position in the industry
- Is fluent in English and Dutch, French is a plus
- Has experience with MS office is required, experience let CAD is plus

😊 Attitudes

- Loves innovation and dare to think out of the box
- **Is** a real team player but can also work well independently
- Proactive and always think a step further
- Quality is your priority
- Quick to understand and master new knowledge
- **Applicant must have a valid work permit/ permission to work in Belgium**
- **Relocation not provided**

☐ You will feel like a fish in our water if...

- You like honest, straightforward, and to-the-point communication in **Dutch or English** (open feedback make us all better)
- Integrity is one of your key values
- A '**work hard-play hard**' culture in a pleasant and dynamic start-up drives you
- You are **socially engaged** and you believe in the power of 'business as a force for good'
- You don't take yourself too seriously

☐ You'll love us for

- **Changing the world** for the better and giving you the chance to be a part of it
- **Investing** in you: we believe talent like yours needs to be fostered and watered regularly for it to grow
- Providing you with opportunities: our company is growing and so will you
- An **attractive and creative remuneration package** for a job with impact
- A flexible schedule in place and time: you **schedule your work as it fits you**, to be at your best
